

**MI Deliver**  
Enterprise-grade Solution

## Intelligent Delivery Software

CounterMind is a standards-based, ready-to-deploy solution for automating field-based delivery tasks. Our MI Deliver application offers intelligent workflow processing that tracks the delivery process and integrates with existing business systems. We utilize the latest mobile device features such as: barcode scanners, RFID, GPS, and signature capture in ways our competition can't. Discover why CounterMind is the first choice of leading delivery and logistic companies nationwide.

## Product Applications

Designed with speed, ease of use and scalability in mind, our mobile MI Deliver application is a must have for overnight shipping companies, same-day courier services and more. Choose our complete solution to transport shipments on-time and efficiently track assets. Eliminate excessive paperwork and achieve amazing increases in productivity. CounterMind's MI Deliver application will enable your business to:

- Complete pre/post truck inspections and load reconciliation
- Assign, track and record delivery, including authorization or sign-off when assets or products are delivered
- Use GPS to track delivery and asset location
- Provide real-time status for delivery time and location
- Manage inventory or assets with barcode reading
- Trust our software to keeping working for you as devices change and migrate over time

*"We use CounterMind because it is reliable and efficient – within 90 seconds of delivery, customers can get real-time status on deliveries over the Web. It is also very efficient and robust, which gives us a competitive advantage by providing superior service levels to our customer."*

– Tim Elder, Director of Information Technology, OnTrac
